

Riskconnect for the **AGED-CARE INDUSTRY**

Riskconnect helps you identify, assess, and learn from aged-care incidents, while providing proof of effective risk management to regulators and inspectors.

Protect the elderly from unnecessary risk. Establish consistent risk management, strong governance, and a risk-aware culture to keep people safe.

Shorten response time. Accurately capture incidents and near-misses, so issues can be quickly and effectively addressed.

Handle compliance with ease. Manage complex regulatory obligations from one place.

Trusted by Industry Leaders

10+ Aged-Care
Customers

Riskconnect was an absolute standout in terms of the systems that we reviewed. It was most important that we could have adequate reporting, and that we had the ability to configure the solution so that it was right for our board and leadership team. Riskconnect was able to deliver both.

Head of Risk and Regulation
HammondCare

Respond Faster to Improve Outcomes

Protecting the elderly at the highest level requires coordination across disciplines and easy access to a single source of trusted truth.

Riskonnect tracks incidents and near-misses in one place to give you the unobstructed view necessary to spot trends and ensure corrective plans are in place.

Stay in Compliance

Maintaining compliance with expanding regulatory requirements for privacy, accreditation, incident reporting, and more is a tall order – with steep consequences for noncompliance.

Riskonnect has built-in tracking to help you stay on top of important regulations such as the Serious Incident Reporting Scheme, maintain documentation, and streamline reporting to provide proof of effective risk management to regulators and inspectors.

Capture Incidents on the Go

Cleaning up incident data that was incorrectly submitted takes a lot of extra work on the backend – time that would be better spent on providing care.

Riskonnect captures critical information about operational and clinical incidents accurately and completely from any place, including images, event details, and location geotags, so you can make better decisions faster.
