A wireframe figure of a person wearing a hoodie, sitting at a computer. The figure is composed of a network of green lines and dots, giving it a digital or cybernetic appearance. The figure is positioned in the center of the frame, with its hands resting on a keyboard. Behind the figure is a large, glowing green rectangle that represents a computer screen, displaying horizontal lines of data. The background is a dark blue gradient, filled with various digital elements: a globe made of dots in the upper right, a stylized star or network diagram in the lower right, and several rectangular blocks of data points or code on the left and right sides. The overall aesthetic is futuristic and tech-oriented.

The background of the image is a blurred photograph of a person's hand typing on a laptop keyboard. A semi-transparent green overlay covers the entire image. In the center, there is a circular graphic with a white border. Inside this circle is a stylized representation of a microchip or AI brain, featuring a central square with a gear, a checkmark, and an 'X', connected to several small circles. Surrounding this central circle are various icons: a lightbulb with an exclamation mark (top left), a gear with a checkmark and an 'X' (top right), a bar chart with a line graph (bottom right), and a checklist with an exclamation mark (bottom left). The background also features faint, scattered binary code (0s and 1s) and dashed lines, giving it a high-tech, digital feel.
