

## Riskconnect for the Infrastructure Industry

**Riskconnect software integrates risk data, analytics, and insights to help you deliver at every phase of your projects.**

For global engineering and construction companies, managing risk is essential for the success of every project – whether it’s the design and construction of a simple office building or a decade-long joint-venture rail project with hundreds of subcontractors. Project management skills alone aren’t enough to compete in today’s world. You must be adept at managing risks.

Do you have what it takes to get in front of risks – and keep your projects on track to meet all performance metrics?

*“Riskconnect has enabled a culture of risk thinking that wasn’t there before. The organization now sees risk management as a value add, not just a box-ticking exercise.”*

*Ajay Patel, Head of Risks – Projects and Programmes  
Transport for London*

## Increase Visibility and Minimize Threats

Riskconnect can help you manage uncertainty of any type across all your projects. You can secure more contracts, achieve better project outcomes, enhance workplace safety, and even improve claims handling.

## Win more business.

Determine which new projects to pursue and win those contracts by demonstrating your understanding and mastery of the risks involved.

## Optimize your use of capital.

Apply risk insights and experience to understand your project costs and inform decisions about how to allocate contingency funds to maximize your resources.

## Improve communication.

Make decisions quickly and confidently, even in complex multi-entity projects.
