

Threat Intelligence

Riskconnect's Threat Intelligence software helps you monitor global threats in real time and respond faster and more effectively to critical events.

Boost situational awareness. Understand the real-time context of events that could affect your organization so you can move faster to secure your people and assets.

Filter out the noise. Easily customize the geographies, threat types, and severity levels to stay focused on only the events that are relevant to your organization.

Act faster with automation. Configure automatic alerts and system workflows to be triggered when specific threat conditions occur, saving time and expediting your response.

Product Highlights

LIVE THREAT MAP

Draft and send new messages, view sent messages, and track delivery and response status from anywhere.

THREAT RULES AND ALERTS

Deliver communications via voice, email, and SMS.

AI-DRIVEN | HUMAN-VALIDATED FEED

Receive accurate, real-time information populated by OnSolve Risk Intelligence, and AI-driven threat feed that continuously monitors thousands of trusted, human-validated global data sources to detect and classify critical events quickly and accurately.

Initiate Your Response Automatically

How much time do you waste getting your act together before you can respond to a disruption? Riskconnect's Threat Intelligence software allows you to respond immediately with automated strategic workflows and alerts.

- Build workflows that instantly alert stakeholders or response teams when a threat meets your specific criteria.
- Take immediate action after reviewing a threat – like creating a new incident or sending mass notification – using the on-page actions menu.
- Easily configure rules around who should be alerted and when.

Continuously Monitor Your Most Critical Assets

Are you confident that the assets most critical to your organization's operations are secure at all times? Riskconnect's Threat Intelligence software allows you to keep tabs on everything happening around your assets to maintain business continuity.

- Select the most important internal contacts, suppliers, and locations to monitor on the threat map.
- Evaluate threats by low, medium, high, and extreme severity levels, and set a monitor radius from each location.
- Manually create your own threat event to record disruptions unique to your business or processes.

Maintain Real-Time Awareness Using a Single Solution

Are you overloaded with information from various sources through different channels? Riskconnect's Threat Intelligence software provides a comprehensive view of your risk landscape in one place, giving you a better understanding of which disruptions are actual threats to your operations.

- Pull in information from global data sources like news (local, national, and international), federal government agencies, curated social media feeds, and more.
- Use a single viewpoint to see all threat categories, ranging from natural disaster to civil unrest and crime.
- Manage all readiness and response activities in one platform to centralize your operations and reduce manual workload.
