

Riskconnect for the **BUSINESS SERVICES INDUSTRY**

Riskconnect software helps you manage the risks that drive up insurance costs, slow contract wins, and jeopardize your people, clients, and reputation.

Stay audit ready. Track regulatory, industry, and client requirements – from OSHA and ISO standards to security and data-handling expectations – in one system to easily demonstrate compliance to regulators, customers, and prospects.

Protect your people and operations. Capture incidents, near-misses, and operational risks from any device to identify loss drivers early and prevent events that fuel claims and premium increases.

Stop small issues from turning into a big expense. See how incidents, vendor gaps, and operational risks connect to contain damage before it triggers regulatory fines, increases insurance costs, or endangers a contract.

READ THE STORY

Maintain a Safe Work Environment

Minimizing workplace injuries not only keeps employees healthy, but it also reduces costs from claims, regulatory violations, and labor.

Riskconnect captures incident details from any device and consolidates risks, safety, and quality data in one centralized location to help you prevent accidents, prioritize corrective actions, and reduce insurance costs.

Simplify Compliance

Strict safety rules, environmental mandates, and customer standards mean you must track and report your actions – or risk steep penalties.

Riskconnect has built-in compliance tracking to help you stay on top of important regulations, standards, and protocols like OSHA and ISO 45001, maintain a clear audit trail, and demonstrate transparency to regulators and customers.

Eliminate Blind Spots

Risks hiding in multiple spreadsheets can result in huge fines, lost contracts, supply chain surprises, and security lapses.

Riskconnect helps you manage interconnected risks with end-to-end visibility to speed response, eliminate uncertainty, strengthen operational agility, and prove reliability.
