Director, Partners and Alliances
Riskconnect, Inc.

Power of Analytics Continued

Last year we introduced the Workers' Compensation Diagnostic

- Know your claims and control cost

This year it is our entire Property Tool Suite

- Understand risks across your asset footprint
- Plan for tomorrow
- Proactively engage insurance markets and optimize insurance spend

A Path to Empowerment

Operationalize

- Models
- Data
- Insights

New found expertise

- Proactively identify and diagnose
- Scenario plan
- Data-informed decisions
- Actionable next steps

More value. More focus. More impact.

- Improved Efficiency
- Greater Influence
- Expanded Remit

Good Morning Tom

Risk Intelligence Quantified (Risk IQ) is your new online hub giving you easy access to all of your Risk Tools in one place.

My Analysis My Solutions **All Solutions**

- Climate Diagnostic [Solution Information](#)
- Climate Quantified [Solution Information](#)
- Connected Risk Intelligence [Solution Information](#)

Your ESG Score

ESG Clarified combines an extensive set of external, market-leading data with proprietary internal WTW data sources and analytics to create a unique and powerful lens into your ESG initiatives and risks.

- Risk adjusted benchmarking
- Continued innovation

Property Quantified

Quantify your global property loss potential from both catastrophe driven and non-catastrophe perils. Create, test and evaluate insurance strategies. Get more from your property risk spend.

Our refined evaluation of your property portfolio:

- Analyze both **catastrophic and non-catastrophic risks**
- Quantifies property loss exposure **by peril, geography and location**
- Compare strategies and interrogate value
- Create **custom groupings** to interrogate losses and analyze strategies
- Considers your own **statement of values, loss runs, and engineering reports**
- Risk IQ facilitates engagement through **live interaction**

Comprehensive Cost of Risk

Filter by Peril: All Perils, Earthquake, Flood, Non CAT, Tornado, Windstorm, Winterstorm

Powered by Esri

Climate Diagnostic

This dynamic model allows you to evaluate your entire global geographic footprint against climate change scenarios from now to 2100.

View high risk areas, locate individual assets and identify risks and exposure. Download data, relative impact of each hazard, reports, system data sets, and interactive geospatial maps. Download supportive information for regulatory disclosures in PowerPoint.

Find climate scenario to adjust scores. Search for locations and order by

Select your time period
