

Riskconnect Patient Safety software tracks and manages the full event lifecycle so issues can be swiftly and effectively addressed.

Improve patient outcomes with precise, trustworthy data. Quickly and accurately get information to those who can investigate, evaluate, and take action to improve patient safety.

Customise actions to promote a risk-aware culture. Instantly notify relevant staff about adverse events.

Increase visibility to identify issues and protect your reputation. Automate and streamline the audit process to ensure compliance and offer proof that the best care has been provided.

“We wanted to improve the number of events reported in the system by 3% to 5% – but we actually have seen 10% to 12% increase. And in some cases, a 15% to 20% jump in the number of events reported using the Riskconnect system.”

Maulik Thaker, Executive Director, LifeBridge Health

Product Highlights

FAILURE MODE AND EFFECTS ANALYSIS

Identify potential failures in clinical processes, systems, or equipment before they occur and harm patients.

INCIDENT AND EVENT REPORTING

Capture complete and accurate information on safety events, near misses, and unsafe conditions, and alert the right people so issues can be swiftly addressed.

ROUNDING

Create, organise, aggregate, and analyse rounds completed by staff – then integrate and correlate the results with data from other sources for a comprehensive, actionable view.

PREDICTIVE CATEGORY CLASSIFICATION

Reduce decision fatigue for nurses and speeds investigation time by automating the process of selecting the correct category of the incident event.

ADVERSE EVENT SEVERITY PREDICTION

Help triage and prioritise incident investigation by accurately forecasting severity of event at submission.

EVENT SUMMARISATION

Improve user productivity by instantly summarising key data points related to events with one click.

PATIENT EXPERIENCE

Capture compliments and complaints, visualise satisfaction metrics, and automatically send alerts to reduce preventable harm and improve patient outcomes.

PHARMACY SAFETY

Seamlessly connect your clinical data to corporate risk and compliance efforts to improve patient safety and satisfaction and meet regulatory requirements.

ROOT CAUSE ANALYSIS

Quickly identify underlying issues so measures can be taken to prevent future events.

EMR/EHR INTEGRATION

Enhance data integrity and ease of use through HL7-compliant integration with EMR systems, such as EPIC, at the click of a button.

OPEN DISCLOSURE

Respond quickly when unexpected events cause patient harm using a standardised, transparent, and empathetic communication process.

Protect Patients with a Faster Response

Still working with paper files, fragmented or single-point solutions? Riskonnect's Patient Safety software tracks and manages incidents, complaints and grievances, and follow-up actions to manage the full incident lifecycle from one place.

- Capture compliments and complaints with QR codes, hotlines, or clickable links to forms.
- Send notifications and task assignments automatically, plus reminders and escalations.
- Improve visibility into the audit status of accreditation, environment of care, infection control, hand hygiene, and more.

Enjoy Fast, Precise Incident Reporting

Are users frustrated by the complexity and time it takes to report an incident? Riskonnect's Patient Safety software is accessible and intuitive to use for fewer data errors and improved productivity.

- Simplify safety-event reporting with an icon-driven portal and survey-style questionnaires that show only relevant questions.
- Eliminate duplicate entries through automatic data validation.
- Reduce the risk of adverse clinical outcomes and promote a culture of safety.

Find and Resolve Issues Before They Escalate

Are you drowning in data but starving for information? Riskonnect's Patient Safety software applies a standardised, data-driven process to root cause analysis for consistent results.

- Seamlessly integrates claim, incident, occurrence, and cause data for a singular view into events.
- Uses a fishbone diagram to explore the cause/effect relationships between the incident and various factors.
- Identifies and resolves issues in advance of accreditation reviews.

Integrated Risk Management Solutions:

INSURABLE RISK

- Risk Management Information System
- Claims Management
- Billing
- Policy Administration
- Health & Safety

ACTIVE RISK MANAGER

HEALTHCARE RISK & PATIENT SAFETY
