

GOVERNANCE, RISK, AND COMPLIANCE

Operationalize Healthcare Third-Party Risk Management with Riskonnect

Riskonnect brings third-party risk, IT risk, compliance, enterprise risk, and AI governance workflows together in one system of record. With a unified view, you can continuously monitor vendor risk, connect evidence to regulatory requirements, and produce audit-ready proof on demand - before a vendor failure becomes a breach, an audit finding, or a patient safety event.

Get ahead of the mandates. Operationalize continuous risk analysis, written vendor verification, MFA and encryption oversight, and third- and fourth-party visibility before requirements become enforceable.

Treat vendor risk as patient safety risk. Connect vendor incidents to your third-party and IT risk management programs so leaders can understand the operational and clinical impact.

Prove readiness on demand. Replace fragmented tools with a single, audit-ready record that connects vendor evidence to HIPAA, HHS CPGs, S.3315, and CMS expectations.

Product Highlights

- Vendor, Products, and Services Assessments
- Certificate Management
- Risk Rating
- IT Asset Monitoring
- Financial Impact Analysis
- Risk Analytics and Insights
- Regulatory Frameworks

Riskonnect Supports Healthcare Vendor Oversight

Continuously Monitor Vendor Risk

Can you prove your vendors and business associates are secure between annual assessments? Riskonnect helps you replace point-in-time reviews with continuous, evidenced oversight across the full vendor lifecycle.

- Set risk thresholds and automatically trigger reassessments when vendor conditions change.
- Capture written verification of safeguards, including MFA and encryption controls.
- Maintain current, audit-ready evidence from onboarding through ongoing monitoring and offboarding.

See the Whole Vendor Chain

Do you know where risk is inherited through your business associates' vendors? Riskonnect brings third- and fourth-party exposure together with cyber, compliance, operational, and financial health signals in one vendor profile.

- Map vendor relationships, downstream dependencies, and inherited subcontractor risk.
- Identify concentration and disruption risks before they affect operations or patient care.
- Add Argos Risk financial health, business viability, and cyber score intelligence to monitor vendors' financial stability and IT risk posture.

Connect Critical Information

Can your organization respond when a vendor failure becomes a cyber incident, operational disruption, and patient safety event at the same time? Riskonnect connects vendor evidence to your compliance and enterprise risk program in one platform, so the moment a vendor's risk posture changes, the right people are already working from the same record.

- Escalate vendor risk changes to the right security, compliance, procurement, and risk teams.
- Work from one shared record instead of disconnected spreadsheets and standalone rating feeds.
- Produce reviewed, tested, and updated evidence on demand for OCR, CMS, auditors, and leadership.

Start anywhere. Expand everywhere.

Riskonnect is the leading provider of software that brings risk under one roof. The technology empowers organizations to anticipate, manage, and respond in real time to strategic and operational risks across the extended enterprise.

More than 2,700 customers across six continents partner with Riskonnect to gain previously unattainable insights that deliver better business outcomes. Riskonnect has more than 1,500 risk management experts in the Americas, Europe, and Asia-Pacific.
