

ONGOING PROFESSIONAL PRACTICE EVALUATION (OPPE)

FRUSTRATED BY A CLUNKY OPPE PROCESS?

Ongoing Professional Practice Evaluation is something every healthcare organization is required to do for Joint Commission compliance and to monitor patient safety and quality of care. But performance reviews can be difficult to execute accurately and consistently when data is kept in disparate systems and indicators vary between disciplines. Trying to sort it all out takes time and effort – and no one has that to spare.

STREAMLINED, CONSISTENT, AND ACCURATE

Riskconnect's OPPE software simplifies and standardizes practitioner performance data collection to help healthcare organizations comply with OPPE standards. The software provides a centralized source of reliable data to easily compare practitioner performance with departmental indicators and verify quality of care – which can lead to better patient outcomes.

CONSISTENTLY AND ACCURATELY EVALUATE PROVIDER PERFORMANCE.
