

Interconnected Risk RMIS + ERM

Riskconnect’s RMIS and Enterprise Risk Management software together connect insurable risk data to enterprise risks for a comprehensive view of your risk portfolio.

Enhance risk visibility and awareness.

Collect, manage, and analyze all risk data – including incidents, claims, safety, and more – from one place for a real-time view into your entire risk landscape.

Make better decisions.

Proactively identify emerging threats, optimize resource allocation, and make informed decisions that align with strategic goals.

Connect core data.

Keep important shared risk data – locations, assets, risks, incidents – seamlessly in sync.

“ Riskconnect has allowed us to embark on actions we’ve never had clarity on before. If no action is coming out of the data, what’s the point.

Trey Braden,
Director, Risk Management, Randstad

RMIS	Benefit of Connection	ERM
Excels at managing insurable risks like incidents, claims, and safety.	A holistic view of risk across the organization	Excels at managing noninsurable risks like geopolitical threats, regulatory changes, and reputation.
Streamlines the collection and analysis of claims and insurance-related data.	Standardized risk assessment, treatment, and monitoring	Streamlines the evaluation of enterprise risks with risk registers, heat maps, and other analytical tools.
Easily builds customizable reports highlighting TCOR.	More strategic decision-making	Easily builds customizable reports highlighting KRIs, KPIs, and other important metrics.

RMIS + ERM

EXPAND BEYOND CLAIMS TO ENTERPRISE-WIDE RISK

- Go beyond loss and claims data to capture operational, strategic, financial, cyber, and third-party risks across the business.
- Tap into a single source of truth for all risks – not just insured events – for unobstructed visibility.
- Proactively identify emerging threats, optimize resource allocation, and make informed decisions that align with strategic goals.

CONNECT RISK DATA TO BUSINESS IMPACT

- Translate risk exposure into business terms to show leadership where risks exceed tolerance.
- Visualize risks alongside claims trends to reveal patterns, correlations, and potential emerging threats.
- See the connections between risks and the potential impact to the organization with enhanced mapping and visualization tools.

IMPROVE EFFICIENCY AND BREAK DOWN SILOS

- Link RMIS claims data with ERM controls and frameworks to avoid duplication and enable more proactive risk management.
- Streamline how risks are logged, evaluated, and escalated, reducing manual effort and increasing accountability.
- Automate data flow, such as RMIS incident data triggering ERM alerts, improving risk management by boosting efficiency and reducing redundancy.

ELEVATE THE ROLE OF RISK MANAGEMENT IN THE ENTERPRISE

- Move the conversation with leadership from historical claims to forward-looking enterprise risk exposure.
- Model “what if” scenarios beyond claims – e.g., supply chain disruptions and cyberattacks – to better understand the strategic influence.
- Provide the data and insights leadership needs to balance risk-taking with strategic growth.
