

Riskconnect for the INFRASTRUCTURE INDUSTRY

Riskconnect software helps you manage the risks that delay megaprojects, blow budgets, endanger workers, and put your next contract award in question.

Handle compliance across complex projects. Manage OSHA, environmental, and contract requirements in one system across every site, contractor, and project partners.

Keep job sites safe and licenses intact. Capture incidents and near-misses, and operational risks across every jobsite and contractor to prevent fatalities, close claims faster, identify loss drivers, and protect the safety record that contracts and licenses depend on.

Stop one issue from becoming ten. Prevent a single delay or incident from compounding into schedule slips, contract penalties, insurance cost increases, fines, and damaged relationships with funders and partners.

Trusted by Industry Leaders

130+ Infrastructure, Engineering, and Construction Customers

50% of Fortune 500 Infrastructure, Engineering, and Construction Companies

Riskconnect has enabled a culture of risk thinking that wasn't there before. The organization now sees risk management as a value add, not just a box-ticking exercise.

Improve Safety – and Protect the Bottom Line

Nothing is more costly – in human and financial terms – than a preventable fatality or major OSHA violation.

Riskonnect tracks incidents, safety, risks, and claims risks, safety, and quality in one centralized location to help you prevent accidents, improve claims handling, and foster a safety-first culture that saves lives – and licenses.

Eliminate Blind Spots

Risks hiding in multiple spreadsheets can cause unexpected, outsized damage to operations, project metrics, and profit margins.

Riskonnect gives you enterprise-wide risk visibility across jobsites and departments to eliminate uncertainty and keep any project – from the design and construction of a simple office building to a decade-long joint-venture rail project – on track for success.

Avoid Costly Compliance Missteps

A single violation can spark damaging fines, cost overruns, and schedule delays.

Riskonnect has built-in compliance tracking to help you stay on top of tightening standards, track every safety incident with a clear audit trail, and automatically align with important industry regulations.
