

PLATFORM SECURITY

SECURITY YOU CAN COUNT ON

Security is our highest priority at Riskconnect.

Our solutions are built on a cloud-based platform with the highest end-to-end security. We protect your data with tight access controls, strong firewalls, and global data centers. And our infrastructure has been certified by independent third parties.

"We have a lot of sensitive information stored in the system and how that data is housed is very important to us."

Risk Analyst, O'Reilly Auto Parts

PLATFORM SECURITY

TOTAL ACCESS CONTROL

Riskconnect offers the control needed to prevent unauthorized access to your data, down to the field level.

- Data is protected with encryption, audit logs, firewalls.
- Password policies can be set to match your standards for timeouts, length, and strength.
- The platform supports a minimum of 256-bit TLS certificates and 2047-bit RSA public keys.
- All data exchanges are encrypted via SFTP with PGP.
- Also available are data encryption at rest using AES 256 and field-level encryption using key splitting.
- Streamlines EDI sequencing by automating the creation of certain reporting events throughout the life of a claim.

GLOBAL DATA CENTERS

Data centers are located across the globe and are physically secured using a defense-in-depth approach.

- Audits of security controls multiple times throughout the year
- Secure, redundant, guarded data centers
- Complete, seamless disaster recovery
- Dedicated, path-diverse network backbone
- No single point of failure
- Carrier-neutral network strategy

THIRD-PARTY CERTIFICATIONS

Riskconnect's best-in-class security has been independently certified.

- SOC 2 Type 2
- SSAE 16 Type 1
- SSAE 16 Type 2
- ISAE 3401
