

# Integrated Risk Management RMIS + Resilience

Riskconnect’s RMIS and Business Continuity & Resilience software together give you a unified view of risk and recovery plans to help you move from disconnected crisis reaction to connected disruption prevention.

**Take a unified approach to risk and resilience.** Analyze your incident, claims, policy, and asset data alongside business continuity plans to uncover vulnerabilities that you might otherwise miss.

**Prioritize your response.** Factor historical claims and incident data into your business impact analysis to precisely prioritize recovery efforts and resource allocation.

**Continuously improve and strengthen resilience.** Use data-driven insights from RMIS-powered root-cause mitigation to improve crisis coordination and feed lessons learned back into your continuity plans.

“The more you can bring these together and have one view critically, the easier it’s going to be to use them. That’s certainly what regulators are trying to drive, and it makes common sense.”

**Scott Hughes**  
*Senior Manager, Operational Resilience*  
 Nationwide Building Society

RMIS	Benefit of Connection	Business Continuity & Resilience
Consolidates risk-related information – incidents, claims, exposures, and insurance policy data – into a single, secure platform.	Contextual understanding of incident, claims, policy, and asset data to ensure plans address the full spectrum of risk.	Excels at planning and implementing strategies to maintain critical operations during disruptions and quickly recover to normalcy.
Captures incident data right at the source to quickly and accurately get information to those who can investigate, evaluate, and act.	Stronger incident response and recovery by aligning insurance-related insights with business continuity response plans.	Builds and manages dynamic business continuity plans from one centralized location.
Tracks risk and claims data, including locations, assets, and exposures.	Fact-based continuity planning built on historical claims and incident data by property or asset.	Conducts business impact analysis to evaluate how disruptions could affect your operations.

# RMIS + RESILIENCE

## BREAK DOWN SILOS BETWEEN RISK MANAGEMENT AND RESILIENCE

- Create a unified, proactive strategy for stronger incident response and recovery.
- Minimize the impact of risk events by implementing strategies from your business continuity program.
- Proactively identify and mitigate risks, enhance preparedness, streamline data-driven decision-making to drive stronger business results.

## PROMOTE FASTER INCIDENT RESPONSE AND RECOVERY

- Learn from incidents that occurred to better prepare for the future.
- Quickly access RMIS data relevant to your business continuity response plans and notify key stakeholders during a cyberattack, natural disaster, or other disruption.
- Associate business continuity plans with real-time loss and exposure data, ensuring that teams deploy the right resources and actions to reduce disruption and lower losses.

## CREATE A STRONGER RISK-RESILIENCE CULTURE

- Improve operational efficiency by standardizing workflows for risk assessment and incident response.
- Show executives and regulators a unified view of risk and resilience.
- Help risk and business continuity teams collaborate more effectively with operations, IT, crisis response teams, and leadership for a strong organization-wide risk program.
