

Riskconnect's Health & Safety software helps you systematically improve safety, reduce future incidents, and cultivate greater safety awareness within your organization.

**Keep employees safe.** Spend less time figuring out what the problem is and more time solving it.

**Stay ahead of the curve.** Spot early warning signs, monitor trends, and manage incidents that turn into claims all from one place.

**Simplify compliance.** Tap into preloaded protocols and automatic data transfers to regulators/for worry-free compliance.

*Riskconnect breaks the functionality into pieces that make it easier for the claims person to do their job in the context of being an adjuster – but still be connected to the safety person who is using the same information. It's about getting claims, safety, and risk management closer together ... which will inevitably drive better decisions for everybody.*

Covenant Transportation Group, Inc.

## Product Highlights

### AUDIT

Track and monitor every step of a safety audit to ensure compliance, gauge ongoing progress, and evaluate results against past audit scores.

### CLAIMS REGULATORY COMPLIANCE

Use safety data already collected to help you stay on top of recordable incidents, meet reporting timelines to avoid fines, and quickly build critical reports.

### INTAKE

Expedite incident-data collection with intuitive forms, anonymous entry, and web-based access – and attach pictures, documents, and more directly to the file.

### INCIDENT MANAGEMENT

Capture incidents easily and consistently from any device with simplified templates, intuitive forms, and auto-filled fields – and automatically alert those who can investigate, evaluate, and act.

### ROOT CAUSE ANALYSIS

Identify and prioritize risks so that corrective actions can be taken to improve safety and reduce future risks.

### RISK ANALYTICS & INSIGHTS

Easily customize your reporting and dashboards to tell your story and inform decisions.

### Get in Front of Issues Before They Become Claims

Are employees in jeopardy because you can't put the pieces together quickly enough? Riskconnect's Health & Safety software seamlessly integrates data from training, incidents, safety audits, regulatory requirements, and more to give you a clear, up-to-the minute picture of your safety situation.

- Consolidate real-time risk data from multiple internal and external sources to identify trends, emerging risks, and opportunities.
- Save time and money by streamlining and automating processes.
- See a complete and timely picture of what's happening.
- Identify crucial signs and patterns that might otherwise be overlooked.
- Promote a safety culture.

### Communicate Effortlessly from the Frontline on Up

How long does it take to inform all the right people about a safety issue? Riskconnect's Health & Safety software records data right at the source to quickly get accurate, real-time information to those who can investigate, evaluate, and act.

- Quickly mobilize the right resources with automatic alerts.
- Customize dashboards to put important details at your fingertips.
- Attach notes, images, files, and more directly to the file.
- Eliminate duplicate work and improve data accuracy with survey-style intake questionnaires and automatic data validation.
- Make decisions based on data, not intuition.
- Speed up response time with real-time access to critical information from the moment something happens.

### Never Worry About Noncompliance

Does the thought of misplaced documentation, a missed deadline, or steep regulatory penalties keep you up at night? Riskconnect's Health & Safety software consolidates all safety-related activities in one place for easy tracking, managing, and reporting.

- See outstanding action items, approaching due dates, and expected costs.
- Document issues, incidents, and actions with a clear audit trail.
- Easily create reports using templates and dynamic workflows.
- Automatically distribute reports to key stakeholders and regulators.
- Never miss a compliance deadline.
