

Riskconnect for the **FINANCIAL SERVICES INDUSTRY**

Riskconnect software brings together risk and compliance data in one place so you can stay ahead of threats, satisfy regulators, and drive strategic growth.

Handle compliance with ease. Manage complex regulatory obligations from one place with automated reporting, audits, and controls.

Eliminate blind spots. Get full visibility of risk and compliance across the enterprise to make informed decisions.

Stop cascading effects fast. See how risks correlate to quickly halt downstream effects that can wreak havoc on operations and your reputation.

Services Organizations

The ability to move data from a completely different incumbent system was a huge plus. But the biggest thing for us is the user-friendly interface. Riskconnect is just so easy to use. You can have the best tool in the world, but if no one is able to use it, it's pretty irrelevant.

Nationwide Building Society

Prevent Compliance Missteps

A single oversight in such a highly regulated industry can spark millions in fines, cause operational disruption, and inflict lasting reputational damage.

Riskconnect has built-in compliance tracking to help you stay on top of ever-tightening rules, maintain a clear audit trail, and automatically align with important industry regulations, including those from the Bank of England, DORA, and SOX.

Stop Fighting Fires

Even the slightest unknown has the potential to cause outsized damage to operations, reputation, and the bottom line.

Riskconnect gives you end-to-end visibility between risks, controls, regulations, and their interconnections, so you can anticipate vulnerabilities before they escalate instead of scrambling after the fact.

Be Confident about Your Facts

Regulators and customers have little patience these days for disconnected risk systems that obscure the truth.

Riskconnect streamlines workflows, automates processes, and increases data accuracy for stronger oversight and more informed decision-making.
